What is Twitter?

Twitter (X) is one of the world's most influential social media platforms, enabling millions of users to share ideas, news, opinions, and experiences through short messages called tweets. Every interaction—whether a like, retweet, reply, hashtag click, profile visit, or media view—creates valuable data that reflects user interests and engagement behavior.

This Twitter Analytics Dashboard transforms raw social media data into meaningful insights, helping identify engagement patterns, content performance, audience interactions, and trending activities. By analyzing these metrics, organizations and individuals can make informed decisions, improve content strategies, and better understand their audience.

Internship Task Summary

Twitter Analytics  @analytics

This Twitter Analytics Dashboard was developed as part of the ElevanceSkills Data Analytics Internship using the original Twitter Analytics dataset.

Task 1 – Tweet Interaction Breakdown

Analyzed tweet interactions using key engagement and interaction metrics.

Task 2 – Engagement Rate Comparison

Compared average engagement rates across the required tweet categories.

Task 3 – Media Interaction by Day of Week

Analyzed media views and media engagements across days of the week.

Task 4 – Replies, Retweets & Likes Comparison

Compared total replies, retweets, and likes across the required period.

Task 5 – Monthly Engagement Rate Trend

Analyzed monthly average engagement rate trends for tweets with and without media content.

Task 6 – Top 10 Tweets by Engagement

Identified the top 10 tweets by total tweet engagement after applying the required internship filters.
